### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Regarding claims 1-12, the closest prior art is Duecoffre et al. (U.S. Patent No. 6,063,448). This reference teaches hydroxy-functional (meth)acrylic copolymers, hydroxy-functional polyesters, hydroxy-functional binders, and polyisocyanates. The hydroxy-functional polyester component has low molecular weights and may be synthesized from monomers that include caprolactone and hydroxy functional amines. Col. 5, line 55 through col. 6, line 62. The difference between this component and applicant's component A) is the absence of hydroxylalkyl ester of an olefinically unsaturated carboxylic acid having 2-12 carbon atoms in the hydroxylalkyl residue. Although Duecoffre teaches the presence of carboxylic acids in the hydroxy-functional polyesters, there is no teaching or suggestion to use unsaturated esters of carboxylic acids containing hydroxyl groups as specified by applicant. In addition, although Duecoffre teaches hydroxy-functional (meth)acrylic copolymers, these copolymers do not satisfy applicant's requirements for component A). Therefore, claims 1-12 are allowed.
2. Chang (U.S. Patent No. 3,959,201), Schneider et al. (U.S. Patent No. 5,336,711), Dahm et al. (U.S. Patent No. 6,037,404), and Okazaki (U.S. Patent No. 6,767,987) are cited for general interest.

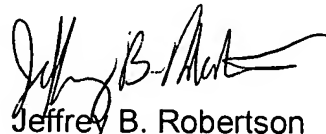

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
